SUGGESTED APPLICATIONS

Offering a holding capacity up to five times greater than conventional "hook and loop" systems, it's a reliable solution for a wide range of fastening needs. This versatile reclosable fastener is designed to be a modern alternative to traditional fastening methods like screws, clips, rivets, snaps, and bolts across various applications.

It features a secure click-fastening mechanism that achieves optimal attachment when the hook structure is fully pressed together. Engineered to handle both light and heavy loads.

SURFACE PREPARATIONS AND FINISHING

Application temperature +15°C to +30°C (environment and substrate). Surfaces must be dry, clean and solid. Clean surfaces with an adequate cleaner. The King Grab is a pressure sensitive adhesive, and as such must be applied with a maximum of pressure in order to achieve maximum results. Expected level of performance will be reached after a bonding period of 24 hours. Always test adhesion prior to application.

SHELF LIFE

Store between +10°C and +30°C and in shaded conditions. Shelf life is 24 months when stored as recommended in original unopened packaging.
